

INTRODUCING

LOGICOURT COMPOSITE

LogiCourt is proud to present LogiCourt Composite, a basketball court that combines ease of assembly with professional-grade performance. This innovative product is constructed using 4' x 8' interlocking panels, ensuring a quick and seamless installation process.

REAL WOOD COMPOSITE MATERIAL

Crafted from high-quality real wood composite, LogiCourt Composite offers a premium playing surface that meets the rigorous standards of professional play. The material not only enhances durability but also provides the authentic feel and responsiveness that players expect from a top-tier court.

DIN-TESTED FOR OPTIMAL PERFORMANCE

LogiCourt Composite is DIN tested for ball rebound, ensuring that every bounce is consistent and reliable, just like on a traditional hardwood court. This certification highlights the court's superior performance, making it an ideal choice for serious athletes and recreational players alike.
